I will introduce the most sold cookie worldwide, Oreo, transformed into a fidget spinner.

I have created it using R188 bearings and 8 M6 nuts of the same size as Oreo. Surprisingly, it spins for a long time, and the feeling in hand is excellent.

You can make it using both FDM and resin printers.

This time, we don't need a bolt without a head; I will upload an easy-to-assemble version.

(This product was printed using a resin printer in the YouTube video.)

If you watch the linked YouTube video, you can see detailed assembly instructions and the process of making an "Oreo fidget spinner."

Please subscribe to the YouTube channel and show your support.

This will encourage us to upload more exciting products. If you have any

questions or ideas for future creations, please leave a comment in the YouTube video, and we will consider them for our next content.

Parts: 1. R188 Bearing x 1ea , 2. M6 nut x 8ea
