Hello!

This time, we created a magnetic fidget spinner based on the feedback from our YouTube subscribers. The previous Oreo cookie-shaped fidget spinner was a rotating type, but this time, we attached magnets to change its shape and made an interesting fidget spinner that can move in various directions.

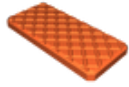

We used Ø6 x 3t magnets, and a total of 16 pieces are needed.

We will continue to listen to your opinions and create more diverse fidget spinners in the future. If you suggest what kind of fidget spinner to make next, we will try to implement it as a 3D model.

Thank you for your attention and love. Please don't forget to subscribe and hit the like button~!!

Thank you!
