Summary

Tool hanger for shed, garage, desk. A ground up redesign of Dallan's Versatile Wall Mount for Garden Tools, and more

[Household](#) > [Outdoor & Garden](#)

Use screws to mount this to a stud in your garage or shed. Get your tools off of the ground and out of the way!

This is a slimmer version of Dallan's Versatile Wall Mount. It prints faster, and is less heavy-duty. It should still hold all garden and lawn hand tools. I added larger clearance holes which should work with flat or bugle head screws (think drywall screws).

I printed at 0.6mm width, 0.32mm height, wall width = 3 lines on a CR-10s.

This remix is based on

Versatile Wall Mount for Garden Tools, Canoe Paddles and More
