Summary

Sturdier Track Mounts for the 3DSets Model 1: Rancher 4x4

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [3dsets](#) [3dsetsmodel1](#)

The tack mounts on my Model 1: Rancher 4x4 kept breaking so I designed a slightly sturdier version. This sturdier version still allows full movement of the suspension. I only created and tested the largest size (approx. 19 mm from frame to mounting point) so if you need another size let me know and I can try to adjust the model and upload for you. You will also notice that there is a front and rear version (mirror image) since one piece is no longer reversible.

This remix is based on
