Gita/Sportcross Boot Shroud Clip and Pin.

Originals are out of stock and discontinued so I made one,

Its functionally the same as the Toyota part and the clip and pin work with original parts.

Toyota/Lexus pt no 64933-53010-A0/C0

I've printed them in PETG .2, but you could print the clip in a strong TPU. (edit yes clip prints well in TPU see photo of 2 white clips)

The clip is a bit delicate and prone to breakages.

4 Files included, a standard 3mf for each and a PrusaSlicer2.6.0 project file for each

Printing the clip with a small raft makes peeling the little bit of support off much easier.

Pin prints best with upside down with support
