Tags: [thingiverse](#) [puzzle](#)

Saw this simple design on a YouTube woodworking channel and thought I would make it in cad. It took a few iterations, but I have some pretty good clearances now. Also created a version with a secret compartment in one of the pieces.

### Print Settings

#### Printer Brand:

Crealitiy

#### Printer:

Ender 3 Pro

#### Rafts:

Doesn't Matter

## Supports:

No

## Notes:

Super simple to print.

## How I Designed This

I was watching random videos on youtube and came across a woodworking video that showed how to make this with 1x4 lumber. Used the plans to model it in fusion 360. Took a few prints to get the clearance right so the parts are snug, but slide easily. <https://www.youtube.com/watch?v=9KkjFKGAo7E>
