An adapter to mount the nice Voron roller spool holder into the original Prusa enclosure. Solves two of the problems I had with the Prusa enclosure spool mount. First, I needed a bit more space between spools and the enclosure door and second, the annoying creepy sound of some spools is gone thanks to the ball bearings of the spool roller.

I use it with the 90 mm bracket, but it should also work with the 100 mm brackets from the Voron spool roller.

The adapter mount is a remix of the original mount from Prusa.
