Summary

I got a request for a 30-06 Ammo box with 86,10mm x 12,60mm space. I have some different lid options.

I got a request for a 30-06 Ammo box and there are more people asking for it and also someone who thought the previous lid was too tight for their ammo. The reason was that I made it tight for the Norma ammo my friend used so it wouldn't rattle. But now I made it 86.10mm x 12.60mm so there should be room for more brands.

I have not printed it myself but hoping Josh who requested it can tell that everything works as it should. It should be fine bec it is basically the same as my older model but with taller lid.

I have moved the lid in Fusion and it looks to not crash with the bullet.

You need 8pcs of M3x20mm screws for the hinge and latch.

Hope you like it.
