### Summary

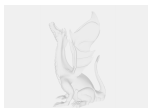

Boomerang for recreational throwing.

[Sports & Outdoor](#) > [Outdoor Sports](#)

Boomerang for recreational throwing. I have included two versions, the second one being slightly more streamlined to reduce drag. I would recommend the regular one for windier conditions and the streamlined, "less-drag"-version if the other one peters out before making a full return.

Made in Blender with a non-destructive sub-d workflow. Have a look at the .blend file and the modifier stack therein to figure out how this was done.
