I wanted a holder for my folding ruler for HSW. I found [this one](#) and liked how it looked, but I wanted something that did not need screws, so I took my first baby steps in onshape and designed these myself.

Obviously you'll need 2 of them to hold your ruler ;-)

The adapter is really a tight fit, don't print to fast to stay as precise as possible! And make up your mind where to put it, it can sometimes be hard to remove it again. Need to work on the adapter more.
