### Summary

External housing to convert an internal 12v socket to an external power outlet.

[Hobby & Makers](#) > [Automotive](#)

Tags: [12vsocket](#) [motorhome](#) [camper](#)

External housing to convert an internal 12v socket to an external power outlet.

Fits both external and internal cable management.

Best printed in ABS or PETG to cope with the warm environment in the camper.

I have been using a socket from the Swedish company Biltema, but it will fit any 28mm-socket. <https://www.biltema.se/bil---mc/elssystem/kontakter-och-uttag/cigarettandaruttag-2000041507>
