These wheel chocks will stop your Hot Wheels 1:43 cars from rolling around on unlevel surfaces. They work on the front wheels, back wheels or both. Very quick print!

HW Chocks-ChockA_43 is easier to print and comes off the build plate very cleanly.

HW Chocks-ChockB_43 uses slightly less filament but is a little harder to remove from the build plate without bending.

Neither design requires a brim.

The .gcode is included to make it super easy to print.
