updated 2. 8. 2023 | published 2. 8. 2023

### Summary

A remix to print Inland PLA+ for all the Micro Center fans out there.

[3D Printers](#) > [Accessories](#)

Tags: [filamentswatch](#) [skadis](#) [ikeaskadis](#) [colorswatch](#)

I liked the original design of these and the original creator even provided Fusion360 file but I took inspiration from this [QR Code Sign](#) to use TinkerCAD for easy customization.

Simply open TinkerCAD, un-group the secondary text “Inland”, input your value, resize (if needed), regroup, and export.

<https://www.tinkercad.com/things/9Y5OTGMK0IW>

I am also including my STL in case all you need is a copy of what I have here.
