This is a Hot Wheels / Matchbox 1:43 scale model of a 4-post car lift for displaying different size diecast cars. These snap together so you don't have to worry about extra hardware or glue.

I've added added a wheel chock near the front of the lift to keep the models from potentially rolling off on uneven surfaces. Additionally, I removed some extraneous material for faster printing.

I've included posts for a 2-car version as well as a 3-car version.

You can print all the parts you need at one time. Supports aren't needed.

For the 3-car version, you will need 2 trays and 4, Post\_Triple\_No\_Screw\_43 posts

For the 2-car version, you will need 1 tray and 4, Post\_No\_Screw\_43 posts

The .gcode is included to make it super easy to print both versions.
