I bought a saltshaker mic last week and needed a way to connect to the quick connect system (On Stage QK2) that all of my stands are on....so here we are. If you have a 633a, it should work. There were multiple manufacturers (Altec, Western Electric and Northern Electric) of the 633a, but my understanding is that they all are the same design so again this should work for them all. It certainly works for mine!

I hope this helps!
