Summary

Bought them, found out the it doesnt fit my renault (figures). So printed out a custom bracket.

Bought the car tablet holder, its cheap, its good enough.

<https://www.action.com/nl-nl/p/lab31-auto-tablethouder/>

Later i found out that the universal tablet mount isnt as universal as i would like.

The minimum distance is 100mm i needed for a renault espace IV.

The minimum of this was about 120mm.

Printed out a bracket that should fit the ball joint as is. Add felt if you want to protect the inner bar for the headrest. Print with supports. But add a no support block on top (the sphere).

Its a quick print / post before i head out on a 30+h drive. So sorry for the low quality post.

Worked fine (took my printer on vacation too). But if your headrests are not removable if e.g. you have a screen on (i had 2 of them) the headrest. you need a split body in order to put it on. I tried twisting it on but it cracked the print. Hence the V2 uses 2 M3 screws in order to clamp on the headrest.
