Summary

Part to fix a drying rack where the bars separated from the rack. Snaps on the 12mm rack and claps the bar with M4 screws.

The original model is for 14mm tubes, but the foldable “wings” of my rack are made of 12mm tubes, so I made a 12mm version of the already existing 14mm clamp.

The overlap between the frame and the bar is parametric so you can easily adapt the part to your needs. The fusion parameter is called “RACK_OVERLAP_WITH_BAR”

Have fun fixing :)
