## Summary

Mario Boo Light switch cover

[Household](#) > [Home Decor](#)

Tags: [lightswitchcover](#) [boo](#) [mario](#) [lightswitch](#) [light switch](#)

A light switch cover featuring raised Boo characters. The pictured print and slice are 0.20 layer height, with the last four layers as the secondary color. I originally printed the whole thing in glow in the dark PLA but then Boo pretty much disappeared ( ironic ) so I printed the plate in black and switched to glow in the dark for the final few layers. Depending on the layer height you select, you just want the Boo color to start after the final layer of the plate is done.

Print face up, and support the underside and two screw holes.
