updated 23. 11. 2025 | published 23. 11. 2025

Summary

This is a updated print-in-place version of the Collapsing Katana that has a single edged curved blade

[Toys & Games](#) > [Other Toys & Games](#)

This collapsing Katana is designed to be printed as one part.

The **Replaceable Blade Version** is available to my Clubs members. Supports are not required, for best results use a .4mm nozzle. Find detailed instructions on how to print collapsing swords on my [website](#). If this is your first time printing, I would suggest you try the **test print** first. If you have issues printing, consider the replaceable blade version. It allows you to print the blades separately in vase mode.

I added a second file with built in supports for the tip of the center blade. Printed on the **Mulcore** Core-XY 3D Printer

Support and Licensing

If you would like to help support more free models or get permission to sell physical copies of my models, consider joining my **Clubs** Membership or using my **Prusa Shop Affiliate**.

Do not repost, distribute, sell or trade the files or physical models of this object.
