I wasn't happy with slinging the tool head cover over the top rod - leaving it in a precarious position / stressing out the cable during maintenance.

Here is a simple hanger which loosely rests over the top rod and fits into one of the cover's triangle openings with a slot to keep it in place.

Safely stows the tool head cover and frees up your hands so you can get business done.

No supports needed for print.

12/03/23 : User requested deeper slot to keep the cover better - V2 added
