Here we go again next project for the contest

- Pen and one pencil

Need:

- only velcro (space for velcro 10x8cm but you can use smaller). Just attach it with velcro to the car. I use 3 small velcro and stay in place very tight.

Print:

- Place straight in slicer and use supports "80" (to make support only for card holder).
- I used 0.6 nozzle and looks great :)

This velcro organizer is specially design to have the most necessary things always at hand.

How many times you get in and get out the car?

Tired of looking the most necessary things to take with you?

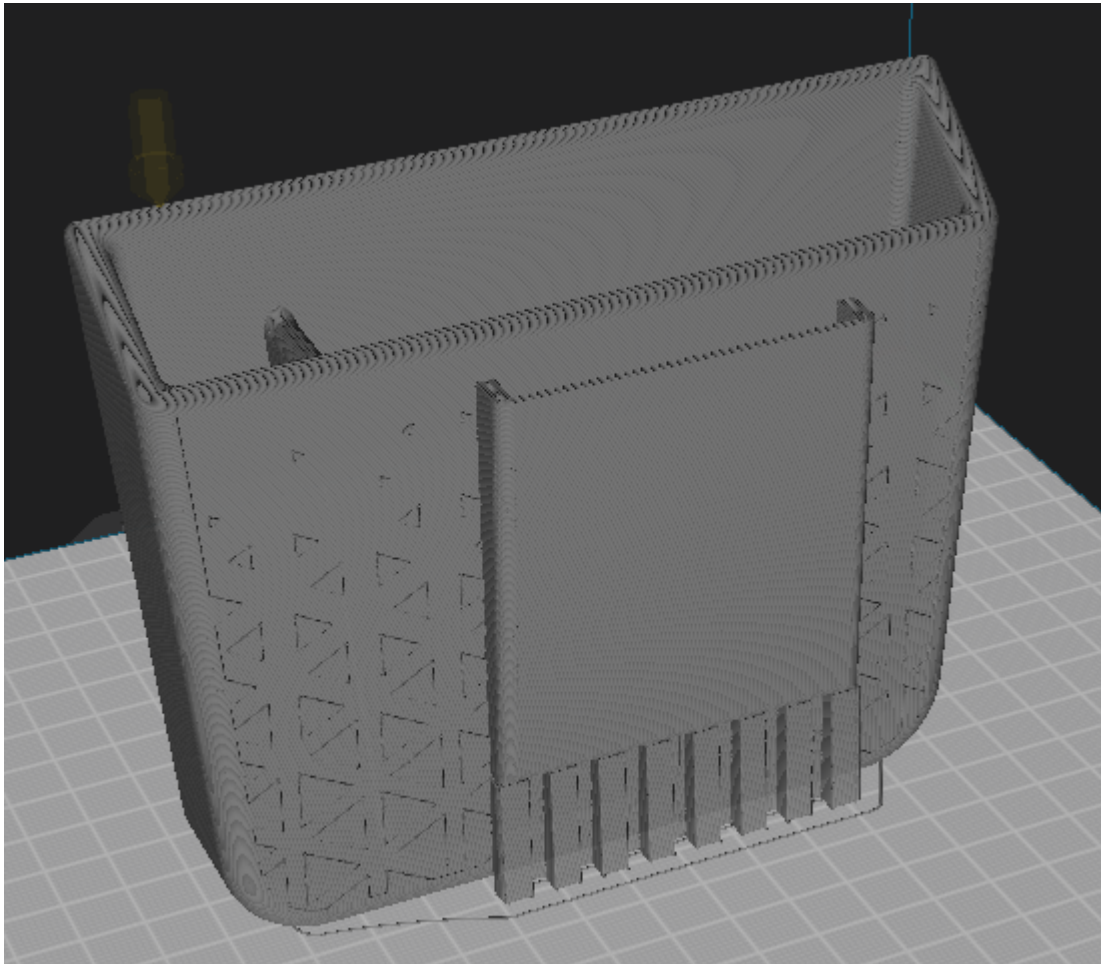

Tired of taking up space in your car's storage?

Throw your phone, cable, pen and you gas station/ points card in the organizer.

Match witch:

all cards/business cards: 85x55cm and 90x50cm

all phones, even Iphone 14 pro max (with case)

Advantages:

- Storage box have pattern to make it more elegant.
- Now your phone is safe from scratches from things that fall in your main car storage in the middle.
- Leave room in your main storage car for things that keep falling in there.

Let me know if you want more car storage like this or maybe you need some upgrade.

As always i'm waiting for your help to improve this project.

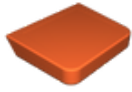

Stay tuned!

Buy me a beer

If you like it and you appreciate my work.

I am collecting for a better printer - Prusa ;)
