Hey everyone! Exciting news – we've just launched the AnkerMake Model Platform. Here, you can access models designed by AnkerMake users themselves, as well as our latest official designs. What's more, we're currently running a model design and printing competition with printers and dream boxes up for grabs as prizes. Feel free to jump in and participate! Here's the link: <https://makeitreal.ankermake.com/>

He is a print in place flexi toy. It's designed so it can be printed at once. No assembly or supports required.

The files are only for private use, you can find commercial license on [MakeItReal](#).
