Tags: [mini](#) [bike](#) [kitcard](#) [bicycle](#) [bendr2](#)

A few months ago, i sold my Polygon Bend R2 bike due to financial constriction and i wasn't cycling all that much.. As nostalgia memories kick in I began to think what i can make with the bicycle in mind.. and after a few days.. the mini bicycle card came to fruition..

The whole kit card was modelled using Tinkercad and 3d printed using Bambulab P1p..

Assembly video can be found here:
