This is a replacement sign post and sign board for the Crate Unloading platform for Tyco US-1/ Tyco Trucking. For the sign post, I include both a version with a strategically placed brim and one without. The brim is 0.2mm thick and can be removed with a razor blade. A needle file is also helpful for clearing out the slots in the sign post that hold the sign board. There are also some very small supports incorporated for the small pegs on the sign board that you will need to file away to make the pegs round. This seemed to be the best way to ensure that the pegs would print reliably. Happy motoring!

Update Jan 27, 2021: I have updated the length of the longer segment, shrinking it by 1.3mm so that everything sits square. I had originally estimated this length-- the newer length should be visibly more precise.

### Print instructions

Unassociated tags: Tyco Trucking, Tyco US-1, Tyco US1
