Summary

Just a random mugshot of inmate #P01135809 made into a lithophane nightlight!

[lithophanemaker](#) [mugshot](#)

Everyone needs a good nightlight, make it super special with this lithophane of inmate #P01135809 and let his bright, cheery expression light up your life!

I used [Lithophanemaker](#) to turn the picture into a lithophane that fits neatly onto their suggested nightlight bases that are readily available from [Amazon](#).

Print this with a translucent filament, typically white. For my print, I used 3D Fuel Snow White Pro PLA, but really any white filament should get the job done. I printed mine on my Bambu X1C at .08mm layer height and didn't change any of the stock settings other than increasing the bed temp and shutting off the brim.

Makes a great gift!
