Summary

This is my second design on a propeller holder for the DJI Air 3. PLA/PETG/TPU/... approved.

This is my second design on a propeller holder for the DJI Air 3. PLA/PETG/TPU/... approved. I added some arrow to the lower part, the tip needs to face in the front direction of the drone. Also I added an DJI logo next to the smart-clip on top of the holder. Furthermore the bottom of the clip is designed that way, that the drone won't touch the ground when laying down with the prop holder attached, preventing it from getting scratched. The drone also fits the fly more combo bag with attached protector.

So print it from whatever you like and enjoy a protected drone. (I personally prefer TPU cause of it's softer surface.) The red one on my pics is printed from PETG, the transparent one from TPU.

Feel free to remix.

Have fun with my model and always travel secure with your Air 3!

For TPU-only variant check my first model: <https://www.printables.com/model/560280-dji-air-3-propeller-holder>
