

Vallejo Paint Color Stand/Holder (25 mm)

Whity

[VIEW IN BROWSER](#)

updated 1. 8. 2025 | published 1. 8. 2025

Summary

A stand for Vallejo paint colors (and other 25 mm diameter bottles with similar height). Available in different sizes.

The following sizes are currently available for download:

Width	Height
3	2, 3
5	2, 4
7	4, 5, 6
9	5, 6

I recommend to fill the bottom with plaster, which makes it much more stable (that's why there is a hole 😊). And some small rubber feet prevents it from slipping around.

Also works great when laid down flat, f. ex. to store it in a drawer.

Support my work

For non-Prusa parts and filaments, check out 3DJake ([International](#), [UK](#), [Germany](#), [France](#)).

I'll get a small cut of any order you fulfil using these links (at **no** additional cost for you 😊).

If you want to support my work directly, you can [buy me a coffee](#).

If you want to order a Prusa printer and earn some Prusameters (I will also get some), you can use my referral code "**@Whity**" at checkout or click one of the following links

(the code only works for the first order of each printer model):

| [CORE One](#) | [CORE One Kit](#) | [MK4](#) | [MK4 Kit](#) | [MINI+](#) | [MINI+ Kit](#) | [XL](#) | [SL1S](#) | [SL1S+CW1S](#) |

Also check out [my other models](#).

Prevent print failure

My first 9x6 failed after 19 hours ☹ because the nozzle knocked over some of the vertical poles:

To prevent this, I slowed down the three critical layers (216-218) to 20% of the normal speed (The 3mf files include this adjustment already):

When printing a large stand (9x6), you should consider to add a manual brim on the sides and on the top, as there is only space left for a 1.2 mm brim on a standard Prusa MK print bed.

To add them, use the “Add part” function (Example file below)

Maybe a bit too much brim, but worked:
