Summary

Kit Card

[Seasonal designs](#) > [Autumn & Halloween](#)

Tags: [toy](#) [halloween](#) [tinkercad](#) [bones](#) [kitcard](#) [skeletons](#)

I remixed the skeleton parts in Tinkercad into a simple kit card making it great for kids and party's. I made to the links connecting the bones only two layers thick at 0.2 layer height, making for easy removal. Check out the original designer <https://www.thingiverse.com/bitsnbolts/designs> for extra add on's.

Print Settings:

0.2mm Layer height

0.4mm Nozzle

I like 100% infill but 10-20% is fine

No Supports No Brim

10mm/s Slow first 2 layers

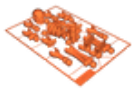

This remix is based on

Glow-in-the-dark, poseable Skeleton w/ extras
