Ever get tired of having to spend hours twisting intricate and realistic-looking trees out of wire?

Me too, in fact, I'm really bad at it.

So much so that I found a solution, use REAL trees for armatures. The Kickstarter included several more trees in an attempt to help the community.

Who went out of their way to support me. I really appreciate the extra help you gave!

The Kickstarter will offer a couple of different options to help in the creation of realistic tree armatures, like a photo reference library (photos of 360 around the trees), rough models for you to tweak yourself, and fully printable models.
