Model parameters

Dimensions (LxWxH)

170 x 84 x 53 mm (100% scale)

Basic information

Great white sharks are definitely among the most fearsome and legendary ocean hunters, so it is not surprising, that everyone would love to have one in their collection. Well, now you have the chance!

Files information

You can choose from 4 .stl files: one complete singlecolor file, and three files for multicolor printing. The multicolor files are optimized for printers with an automatic multi-material system, or a toolchanger. To prevent any issues, please avoid printing the multicolor files separately.

This design is a part of the Articulated Sea Life collection by me. You can check out other designs from this collection [here](#).

The Articulated Sea Life collection is a live project, and I'm continuously adding new designs, anytime I get an interesting idea, or a suggestion. The designs are also updated, if any changes or tweaks have to be made. Feedback, suggestions and ideas are welcome!

Print settings

Material

PLA

Layer height

0,2 mm

Infill

>10%

Support

None. The model was designed not to require any support material.

Scaling

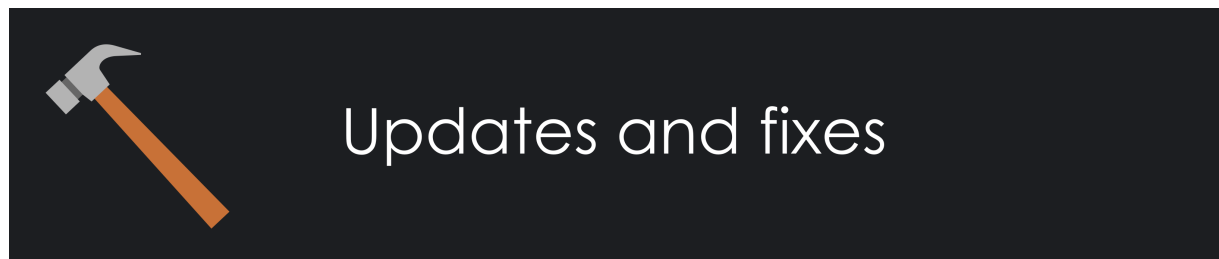

The model should come out perfectly functional even at lower scales. Tested up to 60% of the original scale. Results may vary depending on the accuracy of your setup and quality of the materials used.

Orientation

Default, laid flat on the belly

Adhesion aid

Not necessary, contact area with the buildplate should be sufficient. If your print surface suffers from poor adhesion, consider using an adhesive spray, or an other kind of adhesion booster. Using a brim is possible, but not recommended, as it would be difficult, and inconvenient to remove afterwards.

All resolved past issues with the model files and detailed information about their fixes will be listed in this section. If you're having any problems which aren't on this list, please visit the Known issues section below. If you don't see your problem mentioned there as well, please leave us a message with more details, so that we're able to address it as soon as possible.

8/18/2024

- Added files for multicolor printing.

11/30/2024

- Fixed a non-functioning link in the model description

12/22/2024

- Updated the image gallery
- Minor changes to the model description
- Removed unnecessary .gcode file

Known issues

There currently aren't any known issues/work in progress. If you run into any, please contact me via dm.

Commercial use

My work is free for personal, non commercial use. If you want to sell, or monetize my models in any other way, please visit my [Patreon](#) for more licensing options.
