Summary

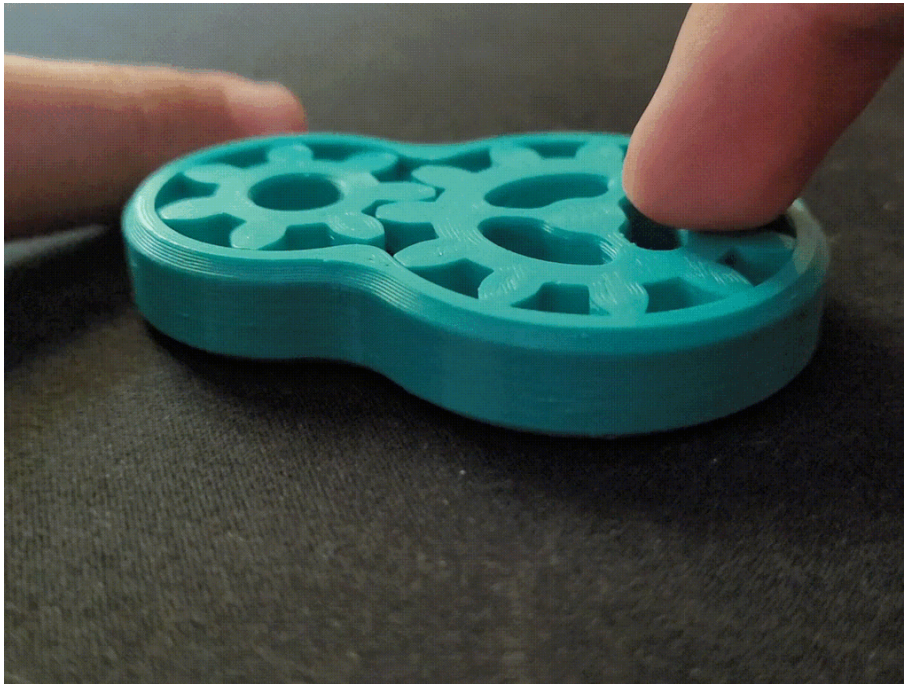

Make grabbing your keys just a bit more fun with this fun gear fidget toy that doubles as a keychain.

What better way to pass the time while you're waiting around with your keys than with a fidget toy!

This is a simple print-in-place model, and no supports or brim should be required. Note that if you want to use a regular key ring with this model (such as is shown in the pictures), you'll want to use a larger version (at least 3 cm in diameter) - as smaller versions will be hard to attach.

I designed this model from scratch for the key tag competition here on printables, but I'm noting this as a remix of [NicoConex's](#) cool gear fidget from which I gained some inspiration. And a big thank you to [Krumps](#) for the above animation!

This remix is based on

Another Gear Fidget :)
