Article about it here:

<https://www.prusaprinters.org/3d-printing-lamps-and-embedding-led-lights/>

The default backplate says "Recording - Quiet please", but I've also included an empty front plate, so you can easily modify it to say whatever you want.

Print instructions

I've added a color change at 0.8mm for the front plate, you can either use clear PLA (or reslice for other filaments) or for example RED pla, which is what I did. I used Prusament Galaxy Black for the rest of the front plate and for the body.
