## Summary

Charging cord getting in the way of other controls in your car or truck?  
Secure them using a cord cleat.

Are you tired of your charging cable getting in the way of other controls in your car or truck such as the radio or getting caught on the gear shift?  
Secure that cord out of the way with a cord cleat.

Secure the cleat (or multiple cleats if needed) to the desired location in your car using double-sided tape or glue it in place for a more permanent adhesion.

I printed this top-side down using tree supports for the overhang.

If you enjoy this model, and feel generous, you can click [here](#) to [Buy Me a Coffee](#).

Thank you, and happy organizing!
