Summary

Mount for a Logitech C270 mount for Ender3 S1. Lower place for better view. You can use the original pin of the C270

Tags: [logitech](#) [c270](#) [logitechc270](#) [webcamholder](#) [ender3s1](#)

The lower position of the cam allows a good view at the nozzle. You can use the pin and screw of the original C270 mount.

Be carefull: The pin has two rings with flat sides. These need to be aligned with the holes of the holder.

Can be printed with minimal support for the 2 holes.

I've added a second version (V2). There the camera is mounted 1cm higher vor a better view during the first layers
