Summary

Filament tag with label that can be used with AMS holder designed by @MarkusMatreku_390422.

[3D Printers](#) > [Accessories](#)

Tags: [tag](#) [filament](#) [label](#) [filamentstorage](#) [filamenttag](#)

Filament tags with labels based on type of filament. They fit in the AMS filament tag stand <https://www.printables.com/model/422327-bambu-labs-ams-belegung> and also in the tag holder <https://www.printables.com/model/606444-filament-tag-holder-for-storage-bins>

One filament change at layer 15 or use the paint tool in your slicer to alter of the raised text. I have also included a 3mf with each tag already painted and on individual plates.

This remix is based on

Bambu Labs - AMS - Belegung

by Markus Matrekus
