This is my rendition of a 2-Gang Surface Mount Box for Decora Remote Controls specifically for the DBX ZC8 controls, might fit ZC9 as well.

I recommend you do not use a boot in the RJ45 as there is limited space and keep the daisy chain cable short.

Use thin cat cables. The Cable passthrough will fit an RJ45 connector but if it has a rubber boot you might need to force it in a bit.

I used 6-32 screws for mounting
