Tags: [apple](#) [keychain](#) [airtag](#) [appleairtag](#) [airtags](#)

Track your items in style with this air rune apple airtag keychain! Make sure you aren't lacking for any OSRS combat spell. The apple airtag is a snug fit that won't fall out but you still have access to the battery for quick changing.

Any standard 0.2mm profile should work well

The loop for the keychain should fit any standard jump ring

I use something similar to this for mine: <https://www.amazon.com/dp/B09WZ6M3YK/>

The cover should click in to place and require a bit of pressure on the spring battery cover to remove.
