Hello !

Today I would like to show you my latest project "Black Pike"

Black Pike is RC Sailing yacht - my own project.

During design, I've made two prototypes.

First one - you can download here

Second (final) version is shown on video below.

Nautical properties propulsion, electronics, steering, hull connecting of both versions are almost the same. Full version have removable superstructure and that's is main difference.

All details are shown in video.

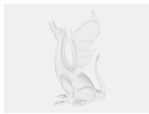

Feel free to ask questions, I always do my best to answer.

Model files

1-hull-fore.stl
