1. This project is for personal use only. Any commercial use is forbidden
 1. **Follow me on Instagram** to keep up with latest designs
[Check out this project's Instagram - @StawiamKlocki.pl](#)
2. Read **FAQ**

Done? Now read the whole description before you print anything. There is everything you need. Don't hesitate DM me here or on Instagram to ask anything!

FAQ:

Q: Why no name plate for my model?

A: If there is not plate that fits your model - let me know in comment/DM. I will add a plate with number and name of your LEGO model for free - just for you! **Alternative:** Download **"Plates - Pruslicer Editable Text.3mf"** edit it in PrusaSlicer, save as STL - import to any slicer like Cura / Bambu Studio

Q: No variant for specific model?

A: Write a comment with requested model - I will add this to my wish list

Q: How to remove circle helpers for Bases in STL?

A: In Prusa Slicer use option - Split to objects/parts - remove unwanted elements if it doesn't fit your printer bedsize or you just have extreme perfect adhesion

Q: What do you do with donation money?

A: I buy more LEGO to develop more variants for this project and LEGO ain't cheap

Q: Do I need additional LEGO bricks, plates, magnets, screws?

A: LEGO parts and screws are a must. Magnets are optional

Q: Can I sell prints of this project?

A: No. It's for personal use only. Gaining any profit from my projects is forbidden

Q: Other cases

A: Write a comment / contact me directly on Instagram / Printables. I will help you with parts you should choose to your model or printing issues.

Where to buy display stands?

Etsy Store with Worldwide shipping!

Star Seller with over **1000 sales** and many positive **reviews**

Help me to design more stands

Be one of my supporters! **Join my club on Printables!** (available from **3\$**)
Get access to **exclusive projects** after making donation. My projects are s
growing thanks to you!

What you need

- **2x4 Lego Brick** - 2pcs
- **1x2 Lego Plate** - 9pcs
- **Screw DIN 7997 3,5x16 mm** - connecting arm to base - 1pc
- **Screw DIN 7997 3x12 mm** - connecting arm pieces - 1pcs
- **5x3 mm** circular magnets - 2pcs
- CA glue - a single drop for magnets

If you are looking for different height, pivot - check out other compatible parts in main project.

⚠️ Licensing Details ⚠️

What's allowed:

- selling prints among your friends and family
- remixing (but it does not change rules) - source files are **available here**

What's required:

- when sharing photos of your print outside Printables always link to my Instagram @StawiamKlocki.pl
- use only original brand new LEGO bricks and strong good quality neodymium magnets

What's forbidden:

- listing on eBay / Etsy / Amazon / Shopee / Temu and other commercial aimed platforms
- listing on Facebook Marketplace / Facebook public and closed groups
- listing on Craigslist / Carousell / OLX and other local selling market platforms
- using any photos from my Printables and Instagram
- removing my logo from parts
- distributing original project files
- being a dick and disobeying rules

What's welcome:

- clicking **donate** button to help buying more Lego and still develop this project and keep it free for everyone
- sending remixes to merge it with project
- sending me opinions and suggestions to help develop project
- posting as many pictures of stands on Printables as you want
- following me on **Instagram** or **Facebook**
- posting Instagram content with hashtag **#stawiamklocki** and mention **@stawiamklocki.pl**
