A take on Bob's Occult wonderful sign [thing:5387694](#)

The files were design to fit the print bed of an Ender 3 and Ender 5 Plus. They can be scaled to fit any printer of your choosing.

If you want to paint around the ghost to give it more of a pop and accuracy, learn from my mistake. I beg of you! Spray the sign with a few layers of a clear coat, and then use black acrylic paint. If you don't use a clear coat, the paint will seep into places it should not go.

A note on the Ender 5 Plus version: It was designed to push the limits of the printer. I had to slice the white ghost part without a skirt in PrusaSlicer just to get it to fit the bed.
