updated 22. 6. 2024 | published 22. 6. 2024

Summary

This will allow you to use the arm rest of your Gen 1 Tesla Model S while still having access to a cup holder.

[Hobby & Makers](#) > [Automotive](#)

Tags: [3dprintable](#) [accessory](#) [tesla](#) [cupholder](#) [teslamodels](#)

This will allow you to have the arm rest of your Tesla Model S to be slid forward while still having access to a cup holder. You can have two of them for both sides of the arm rest or just one.

It is recommended that you print with a material that has a high temperature resistance. NOT PLA! The one in the pictures was printed with Easy Nylon from Overture for high temperature resistance and high durability, but PETG, ABS, ASA, etc. should work perfectly fine.

Printing recommendations:

Supports

15% infill

5 perimeters
