Summary

I needed a small, 15mm x 15mm rubber foot for my Voron 0. I didn't like any of the options I found, so I made my own.

I needed a small rubber foot for my Voron 0 and I didn't like any of the options I found. So I made my own set of 15mm x 15mm x 8mm rubber feet. I assume TPU, so the through-hole fit is very tight to 3mm bolt.

For mine, I used NinjaFlex TPU, and it worked great. Gave it a little sound isolation, while assuring that it didn't slide around on the table.

I've also included the step file if you want to play with sizing it around.
