Tags: [usb](#) [galaxywatch4](#) [galaxywatch5](#)

This is a specialty bracket / stand for the Galaxy Watch 4 (USB-A) wireless charging base that will allow you to plug the charger into a desktop power strip that has a vertically oriented USB charging port and then charge your Galaxy watch 4 or 5 (and maybe 6) using the older Galaxy Watch 4 charger if you still have it.

Easy to print without supports if you orient it upside down on the build surface.

A little tricky to get all the cord to store inside but it will definitely fit!

I can add an OnShape link or STEP files if requested.
