### | BASIC DESCRIPTION |

- number chits sets for base game of settlers of catan 3-4 players and 5-6 players
- The numbers for 3-4 version are:
  - 1x"2"
  - 2x"3"
  - 2x"4"
  - 2x"5"
  - 2x"6"
  - 2x"8"
  - 2x"9"
  - 2x"10"
  - 2x"11"
  - 1x"12"

- The numbers for 5-6 version are:
- 2x"2"
- 3x"3"
- 3x"4"
- 3x"5"
- 3x"6"
- 3x"8"
- 3x"9"
- 3x"10"
- 3x"11"
- 2x"12"

## | DESIGN DECISIONS |

- chits are designed so that on the front side the number and the probability of getting that number are visible
- the probability is displayed using the lines surrounding the number
- on the back side there are corresponding letters and lines that indicate the game version (4 lines for 3-4 players, 6 lines 5-6 players)
- using manual color change you can print the pieces in multicolor using single color printer - in that case the color on the inside can also indicate the base game/extensions (in mine case it is orange for base game, blue for seaferers...)

## | PRINT SETTINGS |

- usually I do not like to include 3mf or GCODE files because I do not know what kind of printer/filament/general setup do you use, SO BE CAREFUL WHEN USING THIS 3MF FILE - CHECK WITH YOUR OWN SETTINGS SO YOU DON'T BREAK ANYTHING ON YOUR MACHINE!
- no supports are needed
- You can use manual color change options to print in multicolor on a single extruder printer
- **General settings:**
  - **0,1 mm** layer height
  - 3 perimeters
  - no supports needed
  - do not use the brim!!! It can be very difficult to remove.
