Summary

This is a rough shape of the front of the molding on the bmw e36 (1994 bmw 318i)

[Tabletop Miniatures](#) > [Vehicles & Machines](#)

This is a prototype of the side molding so it wont have the clips that attach to the vehicle it is just the molding itself to hold up to the vehicle and see if it fits I will be doing more edits on it and updating it whenever I get the chance to do it. (Please note that the cover picture is not the product it is just there to show what the molding is suppose to repersent) Leave a review so I can see what I can change
