### Summary

Collapsible Sword/Lightsaber inspired by 3D printing world

[Toys & Games](#) > [Other Toys & Games](#)

Collapsible Sword/Lightsaber inspired by 3D printing world, i made the model from scratch in fusion360 to be able to customize the size.

inserts are separated and able to be printed in another colour

also included a model with no outer detail, so it is possible to just make a sleeve to change over.

handle diameter: 30mm

handle hole(top): 22.5mm

cap diameter: 36mm

cap height: 18mm

M30 x 3.5 thread

total length: 200mm (handle & cap)

# This remix is based on

## Collapsing Lightsaber (Print in Place)
