### Summary

A small decorative plate for holding items like jewelry, keys, or even a tiny plant (pictured).

It's just a small decorative plate for holding little objects. I use it to collect drainage water from a planter, but you can use it for whatever you want. Maybe to hold your keys? Your rings and earrings? Heck, it might even make a decent Frisbee, but I haven't tried it with anything other than this tiny plant, named Lila.

I didn't bother taking pictures without the planter on it, because the plate is covered in dirt.
