This little reader guide is meant to assist in reducing the strain of reading the small print, and narrow text columns, of most Bibles.

As I read the Word, I find that it can become difficult to track where I am, without a little assistance.

I hope that this will assist you, as it has assisted me.

I have uploaded 2 versions.

One version has two thick ends, to enable a firm place to hold on either end of the guide.

The other has a single thick end, to allow it to also be utilized as a bookmark, when not in use.

If you have any suggestions, please provide, so that I can refine my design.

If this helps you, please provide comments and a like.
