Summary

Snap-fit wemos D1 mini holder to be included in your own 3D projects.

Tags: **wemosd1mini**

This model is not to be used as standalone, but should be integrated in your own 3D projects.

It is a minimal model for holding a wemos D1 mini. It is a tight fit, so might not work for all printers. (I have printed it with PETG on a Prusa i3 mk3)
