Hello,

Here's a rock switch holder for an IKEA JANSJÖ lamp. My switch was causing the light to be flickering sometimes, so I wanted to change it. The switch used is a Carlington 621 series switch, but it can accept any switch with a dimension of approximately 12.8*19.3*26mm. A STEP file is included for any remix :)

Print at 0.2mm layer height, 4 perimeters with no support needed.

!WARNING! You are the only one responsible for the electrical work. Do it at your own risk!
